

BAG-A-MINUTE*

By Sara Gray of SewTogether.net

* Sewing time

SUPPLIES:

- Plastic food storage bag with zip-type closure, in size larger than what you want to store.
- 2" wide fabric strip for binding, length = 1" wider than your bag
- Rotary cutter and ruler (OR ruler, marker, and scissors)

Cut desired length away from bag closure edge. (Allow for loss of 1/2" of this length due to attaching binding)

Bind cut edge:

- I used a 2" wide strip of fabric, cut 1" longer than the bag's cut edge. "Any" binding strip will do.
- Press long edges to center of wrong side.
- Fold under short ends 1/2" and press. Then fold on center and press, enclosing raw edges.
- Insert cut edge of bag into center of pressed strip and sew close to open fabric edges with a medium length stitch (3.0)—be sure to catch fabric edge on underneath side, too. Backstitch to secure thread tails.
